

Pure Water Outsourcing

For Businesses With Pure Water Needs

Ensuring consistent quality and sufficient quantity of specified pure water is critical to keeping your business up and running, so consider outsourcing the entire pure water operation to GE Water & Process Technologies. With our proven ability to handle pure water projects of every size, from maintenance agreements to comprehensive build-own-operate-maintain (BOOM) programs, GE is your single-source provider. We make sure your business has pure water every hour of every day to meet your need, even if you decide to replace your current system with newer, more cost-efficient equipment.

Real Solutions

No matter what your pure water needs are, GE will utilize its network of pure water engineering, mechanical expertise, and chemical technology to make sure the job is done right. Our "Proof not Promises*" motto is our commitment to pure water outsourcing.

GE brings together world-class chemical and mechanical water treatment processes, proven technical expertise and turnkey financing options to provide comprehensive pure water outsourcing options for your business.

If Your Business Relies on Pure Water, Ask Yourself These Questions:

- Is your water treatment equipment old and in need of replacement?
- Does your business ever experience pure water supply disruptions?
- Is consistent pure water quality ever a concern?
- Do environmental health and safety (EHS) requirements ever put pressure on your ability to produce sufficient pure water for your business?
- Would you prefer to focus the people you have on core operations rather than pure water processing?
- Are capital costs for new pure water systems getting in the way of the upgrades your business needs?

If the answer to one or more of these questions is "yes", GE can help.

Leave the Water to GE

For every pure water need, GE has a solution. Contact us today to find out how we can make your pure water program excel.
