

LearningSource

Computer based training designed to provide cost effective, just in time training

Description and Use

LearningSource is the portal for online training curriculum that covers all aspects of water treatment. LearningSource consists of the following:

- Curricula supported on a Learning Management System (LMS)
- Training delivered anytime, anywhere
- Customized content of your choice

Typical Applications

LearningSource is available to all GE Water & Process Technologies customers. Customers should consider LearningSource where online training is the method to continuously train their employees. Customers with multiple sites, a large work force, and organizations that are familiar with computer-based training are ideal users.

General Properties

LearningSource is a series of online courses designed to educate operators, engineers and management in all aspects of water treatment. The courses consist of 6 different curricula with a total of 20 hours of learning. Each course is approximately 20 to 30 minutes in duration.

Curriculum

Your account manager can provide information on the curriculum available and help you select what is right for your specific need.
